

Russell Gallinera

Systems Administrator

Winnipeg, MB | Relocating to Toronto, ON

(204) 962-8829 | russellgallinera@gmail.com | russellgallinera.com

Summary

Systems administrator with 4+ years of experience spanning Microsoft identity, endpoint management, virtualization, data protection, observability, and Fortinet networking. Administers services supporting more than 1,100 users while building secure automation for provisioning, device lifecycle, and infrastructure operations using PowerShell, Microsoft Graph, and Ansible.

Experience

Manitoba Metis Federation

Feb 2024 - Present

Systems Administrator / Winnipeg, MB

- Administer Active Directory, Microsoft Entra ID, Microsoft 365, and Intune for more than 1,100 users and approximately 320 endpoints, managing identity, licensing, Hybrid Join, device compliance policies, application deployment, and Windows patching.
- Build secure PowerShell, Microsoft Graph, and Ansible automation for identity, device lifecycle, Linux provisioning, and infrastructure inventory, using group Managed Service Accounts and certificate-based authentication for unattended execution.
- Build and operate centralized monitoring and log aggregation across 12 FortiGate firewalls and six Dell Proxmox hosts supporting approximately 100 VMs using Prometheus, Grafana, Loki, and Alloy.
- Administer and troubleshoot approximately eight Veeam backup jobs protecting Proxmox-hosted Linux/MySQL workloads and Microsoft 365 data, including a full-system restore that recovered a production service.
- Deploy and troubleshoot standardized configurations across six remote FortiGate firewalls, covering firewall policies, VLANs, FortiAP profiles, certificates, Security Fabric, conditional DNS, and IPsec VPNs. Implement redundant site-to-site VPN connectivity with eBGP routing.
- Implement and administer FortiClient EMS remote-access VPNs for approximately 250 users, combining Entra SAML authentication, group-based firewall authorization, and certificate-based pre-logon connectivity across eligible managed endpoints.
- Support security operations through alert investigation, endpoint containment and recovery, credential remediation, MFA administration, and Conditional Access troubleshooting.

Manitoba Metis Federation

Mar 2022 - Feb 2024

IT Support Technician / Winnipeg, MB

- Resolved more than 30 support requests per week across Windows, macOS, and iOS using the organization's ticketing system and Splashtop, documenting troubleshooting and escalating unresolved issues with clear technical and user-impact context.
- Supported onboarding for more than 10 new employees per month by creating Active Directory accounts, preparing hardware, installing required software, configuring access, and validating workstation readiness.

Projects

Active Directory User Administration Tool

December 2025 - February 2026

- Built a PowerShell and WPF Active Directory administration tool used by eight teammates for more than 100 account creations, saving an estimated two minutes of direct entry per account while improving consistency.
- Implemented reviewable provisioning and data-normalization workflows with validation, conflict detection, OU placement, attribute population, and Entra Connect synchronization, reducing manual edits and inconsistent directory data.

Software License Cost Recovery Automation (Internal Project)

May 2026 - August 2026

- Deployed and maintained a daily PowerShell workflow reconciling Entra licensing data for approximately 1,100 users with Snipe-IT records, replacing manual license tracking.
- Configured and validated MySQL-backed Grafana reporting for departmental software spend, budgeting, and license-recovery reviews.

Education

University of Winnipeg

2017 - 2021

Bachelor of Science in Computer Science / Winnipeg, MB

Certifications

Microsoft Azure Administrator (AZ-104)

Expires Mar. 2027

Microsoft

Cisco Certified Network Associate (CCNA)

Expires Sep. 2027

Cisco

CompTIA Security+ (SY0-701)

Expires Aug. 2028

CompTIA
